PROTECTION

Passion, commitment, know-how – always ready to provide more, never less

Meissner Bolte is a full-service IP law firm offering the complete range of services for the protection of industrial property: from filing an initial application, through examination and registration to the enforcement and success leverage of your intellectual property rights, all under one roof.

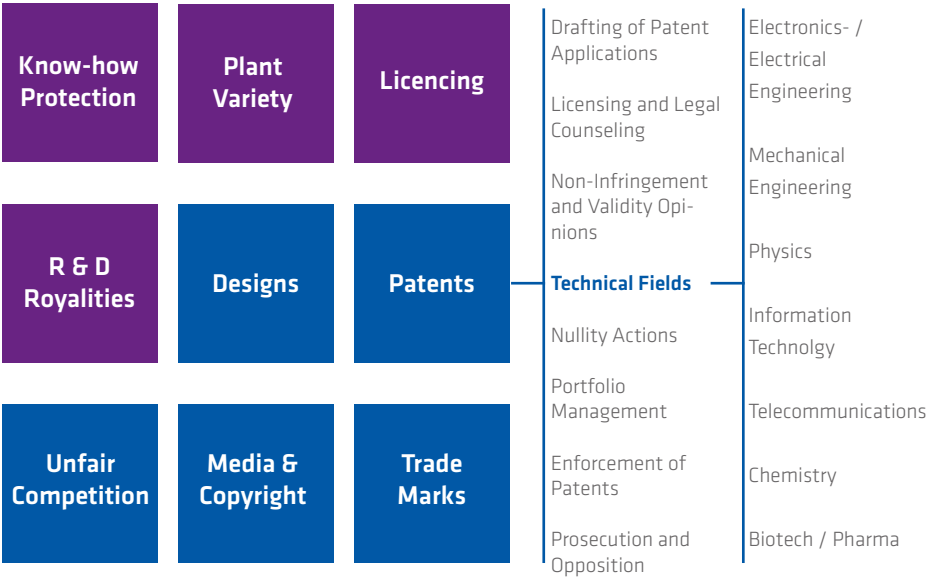

Our patent attorneys and lawyers form cross-industry competence teams, acting together in concert to ensure the success of your know-how. By keeping the entire

breadth of industrial property protection in view, and combining the available opportunities in patent law, trade mark law, design law and copyright law, our professionals develop a powerful, broad and successful strategy tailored to your business.

Our engineers, scientists and lawyers all have passion for what they do. Dedicated to securing and promoting your rights, they always aim to go a little further than you might expect.

Highly qualified – but always practice-oriented

Meissner Bolte’s patent attorneys are engineers and scientists specialised in the disciplines of: physics, electronic and electrical engineering, mechanical engineering, medical technology, chemistry, pharmaceutical science, biotechnology and materials science. In order to strengthen the links between technology and law, many of our patent attorneys have also earned a Master of Laws degree.

Our lawyers are equally fascinated by the interplay of law and technology, in many cases having qualified as lawyers specialising in the protection of industrial property rights. Our legal experts provide cross-industry consultation in the fields

of patent law, trade mark and design protection, copyright law, licencing and unfair competition law.

Many of the patent attorneys and lawyers at Meissner Bolte are active in a wide variety of industrial and professional associations, in part in prominent positions.

Enjoying a regular exchange with colleagues at home and abroad, our professionals experience in real time all current developments in the protection of industrial property, and our services remain in demand for our expertise in all cross-jurisdictional matters.

Shared knowledge versus superficial knowledge: our know-how updates

To ensure that our advice adds the most to your business, we strive to keep on top of all legal and market developments. Our programme of continuous education for our professional and support staff in the form of regular training, seminars and workshops also extends to our valued clients.

IP Days - Each September in Munich we hold our one and a half day seminar during which we present and discuss current developments in IP in Germany, the EU and beyond.

Asia Seminar - An international patent strategy cannot ignore the Asian market. Legal changes are presented with practical tips during our Asia seminar, held each spring in Munich.

Lunch'n Lecture - Well-known IP experts and specialists from our own ranks

provide detailed information on current topics relating to patents, utility models, trade marks, designs and competition law.

MB.Lectures - Our series of webinars covers all aspects of IP. From patent strategies and trade mark protection to current legal developments, these webinars offer a flexible way to learn about important topics without leaving the office. These are pitched for prospective candidates and newcomers to intellectual property law.

MB.News - Four times a year, our newsletter keeps you up to date with current IP topics. You can quickly stay on top of all of the important news whilst also giving you access to our team's detailed assessments of the ever changing world of IP.

Litigation Expertise

At the heart of protecting your innovations lies the ability to enforce and defend your IP. Our litigation team, led by Andreas Kabisch, brings together a wealth of experience from decades of litigation patent cases in German courts as well as the new Unified Patent Court (UPC). We offer clients strategic representation in both national and international disputes, backed by specialized legal and technical expertise.

Whether defending patents, trade marks, and designs against attacks or actively pursuing infringers, we combine legal precision with technical insight to achieve successful outcomes.

We understand that a granted patent or registered trade mark is only as valuable as its enforceability in court. Our team ensures your IP rights serve as competitive tools, providing real-world benefits and financial advantage.

In urgent situations, we employ proven strategies, such as border seizures and injunctions, to protect your rights swiftly and effectively. Our extensive experience in inspection proceedings ensures evidence is gathered and preserved, giving you the decisive edge in critical cases.

Trust us to fight for your rights - so your innovations can thrive.

Our Asia Desk: Protecting and defending IP in Asia

International expertise and strong partnerships - Meissner Bolte has been active in Asia for many decades. Through partnerships with leading IP law firms across the region, we ensure the quick acquisition, efficient enforcement and effective defence of IP rights. Our continuous exchange with colleagues in Asia keeps us updated on all relevant legal developments, allowing us to provide timely and strategic advice. We are proud to manage IP portfolios for some of the region's most prominent companies.

Support for the Korean market -

Meissner Bolte also provides comprehensive support for clients operating in or engaging with the

Korean market. We work closely with well-established IP law firms in Korea to guarantee that our clients receive the highest quality legal advice and representation locally.

Specialised IP advice for Japan - With extensive experience in Japanese IP law, we offer specialised advice that considers the unique legal and cultural aspects of the Japanese market. Working alongside Japanese patent attorneys, we ensure our clients receive expert consultancy, which, if desired, can also be provided in the Japanese language. We support our clients both within Japan and in International matters involving Japanese IP.
